- Choose the plan option from the 3 options available;
- Choose the income frequency from monthly, quarterly, half-yearly and yearly payout modes.

Annuity Payout: Your annuity or income payout is calculated as:

$$\text{Annuity Payout} = (\text{Applicable Annuity Rate} \times \text{Purchase Price}) / \text{Number of annuity payouts in a year}$$

Where,

Purchase Price is the premium amount, excluding applicable GST and cess, paid at inception of the plan; and

Annuity Rate is determined based on Age at Entry, Gender, Plan option, Annuity payout frequency and the Purchase Price. Annuity rates are determined at the inception of the plan and are guaranteed for the lifetime of the annuitant.

Plan Options: You can choose from the following options at inception of the plan:

Immediate Life Annuity

Survival Benefit:

Survival Benefit is the Annuity Payout payable in arrears throughout the lifetime of the annuitant.
